

### **RUGGED UNITS DELIVER UNDER TOUGH CONDITIONS**

When your equipment faces harsh environments, you need roller bearing housed units that are rugged enough to withstand tough conditions and deliver exceptional performance.

Designed specifically to perform under extreme conditions, Timken® solid-block housed units are able to handle up to 1.5 degrees of misalignment and withstand the impact of falling debris. Made of cast-steel housings and Timken double-row spherical roller bearings, their unique sealing design offers protection from contaminants.

Inside Timken's large bore solid block units, you'll find precision-made double nut tapered adapters, seals and solid steel housings. It's easy to find the right housed unit to fit your application.

#### BENEFITS OF TIMKEN® DOUBLE NUT TAPERED ADAPTER HOUSED UNITS

**MECHANICAL WITHDRAWAL NUT.** A simple design that in turn simplifies installation and removal of mounted bearings. The standard tapered adapter sleeve has been extended to accommodate a second nut on the back end. This nut is factory set for nominal shaft sizes and can be adjusted in the field to accommodate actual (under/over) shaft size if necessary.

**REDUCE DOWNTIME.** The sleeve is then tightened as normal until the back nut stops against the face of the inner ring indicating that proper bearing clearance and mounting force has been achieved. This eliminates the need for often difficult and imprecise measuring of in process radial internal clearance. Simplifying the installation drastically reduces installation time while improving consistency. (Note: these sleeves will also accept hydraulic nuts.)

**QUICK DISMOUNT.** For dismounting, the front nut is simply loosened so the back nut can be tightened to unseat the sleeve from the tapered bearing bore, greatly assisting in bearing removal.

**ENJOY EASY ORDERING FOR A FULL ASSEMBLY OR JUST A FEW PARTS.** If you need the full bearing and housing assembly, order the complete kit. But, if you need only one or more parts, order them individually. Our well-stocked inventory typically enables quick shipment of standard parts and assemblies.

- Solid rugged cast-steel (standard) housings
- Enhanced primary and optional secondary seals offer exceptional protection from contamination.
- Standard Triple-lip Urethane seals are 11 times more abrasion resistant than nitrile.
- Load capacity does not change, regardless of the mounting orientation.
- Easy conversion from fixed to floating with one rotation of the retaining nut reduces your inventory needs.

### STRONG COVER UP

Count on Timken's steel auxiliary covers to help keep your spherical roller bearing housed units performing, even in dirty situations. Timken's solid-block housed units provide rugged protection, but in some conditions, may need extra help sealing out troublesome contaminants.

Used with secondary seals, these steel covers are designed to create formidable protection that helps keep your business moving ahead. Our secondary sealing covers will fit on standard units - no special orders and lengthy lead time required.

# TIMKEN HOUSED UNITS HANDLE DEMANDING HEAVY-INDUSTRIAL OPERATIONS:

- Power Generation (Coal)
- Mining
- · Aggregate/Cement
- Metal Mills
- Pulp & Paper/Sawmills/Forestry
- Water Treatment
- Food Processing
- Warehousing
- Movable Bridges/Structures
- Industrial Fans/Blowers

Timken offers a wide range of housed units — spherical, tapered, ball and plain bearings — for many applications. With a choice of split and solid housings, seals, lubricants and other features, you can turn to Timken for your housed unit needs.

# TIMKEN

The Timken team applies their know-how to improve the reliability and performance of machinery in diverse markets worldwide. The company designs, makes and markets high-performance mechanical components, including bearings, belts, chain, gears and related mechanical power transmission products and services.
